- Completely
- Under the given circumstances, yes.

## 12. Was the provision of materials, resources and equipment suitable?

48 відповідей

### 13. How could environment and resources be improved?

24 відповіді

There could be more practical CLIL teaching sessions and more lectures concerning specific methods of CLIL application in terms of life long learning

Theoretical materials prevailed over practical resources. Considering that we didn't have opportunity to travel, visit and observe CLILed classes, learn the techniques, talk to more practitioners, there should have been more practical resources provided at the seminars. I wish pdf handbooks containing practical examples had been shared.

We've got great experience, thank you

Everything was fine!

The duration of some sessions could have been shorter, and more examples could have been added.

Probably, it would be better to get more practical stuff than theoretical

Everyng was well prepared and organized. However, it would be even more useful if there were more focus on practical implementation of CLIL

-

All the materials are interesting and informative; the provided resources are always accessible and useful; the used equipment is reasonable; all instructors' advice is good and helpful.

Thanks to all the organisers of CLIL course for the given opportunity and chance to be a part of this GREAT EVENT!

everything was good

Everything was perfect.

Everything was great

Everything was well organized

Thanks a lot to organizers for these seminars. I would appreciate future seminars.

By personal interaction

The seminar could have been more structured, with distinct profiling of content related to particular technologies employed in CLIL teaching. The general philosophy and framework of CLIL were properly outlined, but the theoretical framework has hardly obtained enough "flesh" that could have been more persuasive in distinguishing CLIL from the contemporary practices employed in teaching culturally and societally relevant topics to university students of English.

By agreeing the time of the seminars with all the participants

1. I was a bit disappointed with the material design section when we were given questions to answer, downloaded homework but never got any response/feedback or the problem was that the instructions were not clear enough and we did what we were not supposed to do...

2. The examples/lesson videos, lesson plans, examples in the presentation itself etc/ could have been more adjusted to meet our needs. We all are language university teachers and it was hard for many of us to imagine how this or that would work with adults and 'very' theoretical subjects not music or geography.

But I am very grateful to everybody for getting me motivated and inspired to move on in CLIL direction!  
Thank you so much!

We expected more feedback on our individual assignments

I'd like to contribute more to the structure of the events.

More materials and resources
