Forms and teaching methods:
traditional lectures, multimedia lectures, interactive lectures,
seminars, practical and laboratory classes, self-study,
distance learning individual classes ato
distance learning, individual classes, etc.Assessment of the academic achievements of graduate students

Assessment	is carried out according to the ECTS system and the national				
	assessment scale.				
	Current control - (individual and frontal oral testing, written				
	testing, test-control, essays, presentations, abstracts, revisions of				
	practical classroom and creative works, round-table discussion,				
	etc.).				
	Final control - exams and credits based on the accumulated				
	points in the process of current control, defence of course work.				
	State certification - preparation and public defence of master's				
	thesis.				
	6 – Program competencies				
	The ability to comprehensively solve complex professional				
	and practical problems in the field of physical training andf				
Integral competency	sport and methods of sport training that require sufficient				
	intellectual potential, as well as advanced knowledge and				
	skills of innovative character.				
	GC1 Ability to improve and develop your intellectual and				
	general and cultural level.				
General competencies	GC2 Ability to comprehend new research methods, to				
	change the scientific and scientific and pedagogical profile				
	of their professional activity.				
	GC3 Ability to freely use foreign languages as a means of				
	business communication.				
	GC4 Readiness to use in practice knowledge and skills in				
	organization of research and design work, in the				
	management of the team.				
	GC5 Ability and willingness to take the initiative, including				
	in situations of risk, to assume full responsibility.				
	GC6 Ability to acquire independently with the help of				
	information technologies and use in practice new knowledge				
	and skills, including in new branches of scientific				
	knowledge, not directly related to the field of activity.				
	GC7 Readiness to use modern scientific equipment (in				
	accordance with the objectives of the Master of Science).				
	Scientific and research and scientific and methodical:				
	PC1 Ability and readiness to independently analyze the state				
	and dynamics of objects of activity, identify actual problems				
	and set specific tasks for their solution.				
Professional	PC2 Ability and readiness to analyze and generalize the				
competenciesofthespe	existing scientific and methodological and research				
cialty	experience in the chosen kind of professional activity.				
	PC3 Ability and readiness to study, to critically evaluate				
	scientific and pedagogical information, domestic and foreign				
	experience on the subject of research, creation of new				
	products.				

PC4 Ability to conduct a patent search and to investigate patentability and indicators of the technical level of development, use of procedures for the protection of intellectual property.

PC5 Ability and readiness to use in the professional activity innovative technologies, modern means and methods of scientific research.

PC6 Ability to plan and conduct analytical, simulation and experimental research; the ability to critically evaluate the data and draw conclusions.

PC7 Ability and readiness to carry out mathematical modeling of processes and objects on the basis of standard packages of automated design and research.

Scientific and pedagogical::

PC8 Readiness for scientific research of effective means, methods, technologies and their use in pedagogical activity.

PC9 Ability to analyze, summarize and broadcast the advanced pedagogical experience of physical culture, recreation and adventure activity.

PC10 Ability to apply the knowledge and pedagogical experience in solving problems in a new or unfamiliar environment.

PC11 The ability to integrate knowledge of a complex nature, formulate conclusions based on incomplete or limited information, while taking into account the social and ethical responsibilities associated with their application.

PC12 Ability to convey the findings and knowledge together with the clear and unambiguous justification to specialists and non-specialists.

PC13 Ability and readiness to logically correct, reasoned and understandably build oral and written language.

PC14 Ability and readiness to conduct dialogue, discussion, business and professional communication, to apply methods of psychological and pedagogical and linguistic influence on a person and a team for the achievement of the set professional goals.

PC15 Ability to continuous self-education.

Organizational and managerial:

PC16 Ability and readiness to accumulate knowledge in the field of organizational and managerial activity.

PC17 Ability to organize individual and collective work with all categories of the population in specific types of physical education and sports activities, readiness to cooperate with colleagues.

PC18 Ability and willingness to make organizational and

managerial decisions related to occupational risks.

PC19 Readiness to independently develop organizational and regulatory documents and use them in their activities.

PC20 Ability to determine priorities in solving current problems and tasks of organizational and managerial activity.

Trainer:

PC21 Ability and readiness to organize and conduct training classes with athletes of high qualification;

PC22 Ability and willingness to summarize best practices in the field of sport of higher achievements and transform it into a training process.

PC23 Ability and readiness to use modern technologies, means and methods of preparation of high-class athletes and to evaluate the effectiveness of their application.

PC24 Ability and readiness to adjust the training and competitive load based on the athlete's control status.

PC25 Ability and willingness to apply an individual approach to training and adventure activities.

PC26 Ability and readiness to use effective means of restoration and increase of sports performance.

PC27 Ability and willingness to carry out sports selection at the stage of sport improvement.

PC28 Ability and readiness to make choices and to use efficient modern means of logistics taking into account the individual characteristics of the athlete and the conditions for conducting training and competitive activities.

PC29 Ability and willingness to develop and implement precompetitive, competitive and after-competition events.

PC30 Ability and willingness to develop an algorithm for competitive activities and to ensure its implementation.

PC31 Ability and willingness to analyze the effectiveness of competitive activities.

Project:

PC32 Ability and readiness to formulate goals of the project (program) for solving problems, criteria and indicators of achievement of goals, building a structure of their interrelations, identifying priorities for solving problems.

PC33 Ability to plan a process and predict the results of professional activity.

PC34 Ability to prepare and coordinate tasks for development of project decisions.

PC35 Ability to use knowledge of technology for designing the structure and content of professional activities.

PC36 Ability and willingness to develop professionally

	oriented programs in the field of physical culture and sports,				
	taking into account the real and predicted needs of the				
	individual and society.				
7 - Program outcomes of studying					
	POS1 Improve and develop your intellectual and general				
	cultural level.				
	POS2 Comprehend new methods of research, change the				
	scientific and scientific and pedagogical profile of their				
	professional activities.				
	POS3 Freely use foreign languages as a means of business				
	communication.				
	POS4 To use in practice the knowledge and skills in the				
	organization of research and design work, in the				
	management of the team.				
	POS5 To take the initiative, including in situations of risk,				
	assume full responsibility.				
	POS6 Independently acquire with the help of information				
	technology and use in practice the new knowledge and skills,				
	including in new branches of scientific knowledge, not				
	directly related to the field of activity.				
	POS7 Use modern scientific equipment (in accordance with				
	the objectives of the Master of Science).				
	Scientific research and scientific and methodical::				
	POS8 Independently analyze the status and dynamics of the				
Knowledge and skills	objects of activity, identify actual problems and set specific				
	tasks for their solution.				
	POS9 To analyze and generalize the existing scientific and				
	methodological and research experience in the chosen kind				
	of professional activity.				
	POS10 To study, critically evaluate scientific and				
	pedagogical information, domestic and foreign experience				
	on the subject of research, create new products.				
	POS11 To conduct a patent search and to investigate				
	patentability and indicators of the technical level of				
	development, use of procedures for the protection of				
	intellectual property. POS12 Use in the professional activity innovative				
	technologies, modern means and methods of scientific				
	research.				
	POS13 Planning and conducting analytical, simulation and				
	experimental studies; critically evaluate the data and draw				
	conclusions.				
	POS14 To implement mathematical modeling of processes				
	and objects on the basis of standard packages of automated				
	design and research.				
L					

Scientific and pedagogical:

POS15 To conduct a scientific search for effective means, methods, technologies and their use in pedagogical activities. **POS16** Analyze, summarize and broadcast the advanced pedagogical experience of physical culture, recreation and competition activity.

POS17 Apply the knowledge and pedagogical experience in solving problems in a new or unfamiliar environment.

POS18 Integrate knowledge of a complex nature, formulate conclusions based on incomplete or limited information, while taking into account the social and ethical responsibilities associated with their application.

POS19 Submit your findings and knowledge together with their clear and unambiguous justification to specialists and non-specialists.

POS20 To logically, correct, reasonably and understandably build oral and written language..

POS21 To conduct dialogue, discussion, business and professional communication, to apply methods of psychological and pedagogical and linguistic influence on the person and the collective for the achievement of the set professional goals.

POS22 Continuously engage in self-education.

Organizational and managerial:

POS23 To accumulate knowledge in the field of organizational and managerial activity.

POS24 Organize individual and collective work with all categories of the population in specific types of physical education and sports activities, co-operate with colleagues.

POS25 Take organizational and managerial decisions related to occupational risks.

POS26 Independently develop organizational and regulatory documents and use them in their activities.

POS27 Identify priorities when solving current problems and tasks of organizational and managerial activity.

Trainer:

POS28 Organize and conduct training sessions with athletes of high qualification.

POS29 To summarize the best practices in the field of sport of higher achievements and transform them into a training process.

POS30 To use modern technologies, means and methods of preparation of high-class athletes and to evaluate the effectiveness of their use.

POS31 Adjust the training and competitive load based on

	the athlete's control status.
	POS32 Apply an individual approach to training and
	competition activities.
	POS33 Use effective means of recovering and increase of
	sports performance.
	POS34 To carry out sports selection at the stage of sports
	improvement.
	POS35 To make choices and to use efficient modern means
	of material and technical support taking into account the
	individual characteristics of the athlete and the conditions for
	conducting training and competitive activities.
	POS36 Develop and implement programs for pre-intensive,
	competitive preparation and after-competition events.
	POS37 Develop an algorithm for competitive activities and
	ensure its implementation.
	POS38 Analyze the effectiveness of competitive activities.
	Project:
	POS39 Formulate the objectives of a project (program) for
	solving problems, criteria and indicators for achieving goals,
	building a structure for their interrelations, identifying
	priorities for solving problems.
	POS40 Plan the process and forecast the results of
	professional activity.
	POS41 To prepare and coordinate tasks for the development
	of design decisions.
	POS42 Use knowledge of technology designing the structure
	and content of professional activities.
	POS43 Develop professional oriented programs in the field
	of physical culture and sports, taking into account the real
	and predicted needs of the individual and society.
8 Dosouro	e support for the implementation of the program
o - Kesoure	At the Department of Theory and Techniques of Olympic and
Personnel support	Professional Sports, which is the graduation department for
	the specialty 017 Physical Culture and Sport, work 9 highly
	skilled specialists. Among them: 4 candidates of science in
	physical education and sports, 4 candidates of pedagogical
	sciences, 1 Honored Coach of Ukraine, 1 Honored Worker of
	Physical Culture and Sports of Ukraine. Thus, the share of
	scientific and pedagogical workers with academic degrees
	and titles is 88.9%. The teaching process will also be carried
	• •
	out by teachers from other departments who work at the main
	place of work. Among them: 4 doctors of pedagogical
	sciences, 1 doctor of philological sciences, 1 doctor of
	philosophical sciences; 5 candidates of sciences, associate
	professors.

	Thus, conducting lectures on educational disciplines by scientific and pedagogical (scientific) workers of the					
	scientific and pedagogical (scientific) workers of the					
	corresponding specialty at the main place of work, having a					
	degree and / or a scientific rank is 100%, including those					
	with a Ph.D. degree or a professor's academic rank - 55.3%.

2.1 List of components of educational and professional program

3. Form of certification of higher education applicants

Certification of graduates of the educational program in specialty 017 Physical culture and Sport is conducted in the form of the defense of the master's thesis and ends with the issuance of the document of the established model for the award of the master's degree with qualification: Master of Sports, Lecturer in Theory and Methods of Sport Training.

The certification is carried out in the form of open public defense of the master's thesis. The defense of the master's thesis takes place in the form of a report of the HEA in the presence of the members of the Examination Board. The report should be accompanied by a demonstration of the graphic part in the form of a presentation or posters and creative work on relevant topics.
