## 2.2. Structural and logical scheme of ONP

## **The scientific component of the educational and scientific program**

The scientific component of education and research programs are not calculated in credits ECTS, but under paragraph 29 (Resolution of the Cabinet of Ministers of Ukraine "On Approval of the Procedure for the preparation of candidates higher education degree of Doctor of Philosophy and Doctor of Science in institutions of higher education (research institutions) from 23 March 2016 r., № 261) its content "is made in the form of an individual plan of scientific work of the graduate student and is an integral part of the curriculum of graduate school."

Education and research programs and graduate curriculum is the basis for the formation of a competitor of higher education individual educational plan and the individual plan of research.

The scientific component of the education and research program involves conducting scientific research under the guidance of one or two academic leaders and designing its results in a dissertation.

Thesis for Ph.D. deployed an independent study, which proposes solving the actual scientific task of specialty 053 Psychology, the results of which are characterized by scientific novelty and practical value, constitute an original contribution to the system of knowledge relevant industry and published in relevant publications.

The scientific component of the educational and scientific program is designed in the form of an individual plan of scientific work of the graduate student and is an integral part of the curriculum of graduate school.

The individual plan of scientific work is obligatory for the applicant of the corresponding degree and is used for the estimation of the success of the planned scientific work.

### **Expected topics of scientific research**

1. Educational dialogue as a factor in the formation of social intelligence of future teachers.
2. Psychological and pedagogical ambush becoming a value-semantic sphere of future teachers.

3. Formation of psychological readiness of students for distance learning
4. Psychological and pedagogical principles of development of leadership qualities of students in the system of vocational education.
5. Development of subjectivity as a factor of social and psychological adaptation of first-year students.
6. Developing assertiveness as a factor preventing professional burnout in the future experts in socioeconomic professions.
7. Development of female identity through art therapy.
8. Psychological and pedagogical factors develop leadership qualities of future teachers in the process of professional training.
9. Development professional reflections how determinants of the formation of life self-determination of modern students.
10. Socio-psychological factors prevention school violence in adolescents.
11. Dynamics of women's identity in the functioning of the family of servicemen - participants in the armed conflict.
12. Psychological manifestations of excessive involvement of adolescents in social networks.

### **3. Form of certification of applicants for higher education**

<b>Form of certification of applicants for higher education</b>	The attestation of higher education candidates for the degree of Doctor of Philosophy is carried out by a permanent specialized scientific council, or a council formed for one-time defense, based on the public defense of scientific achievements in the form of a dissertation. The state of readiness of the graduate student's dissertation for defense is determined by the supervisor (or by the consensus decision of the two supervisors). Successful completion of his/her curriculum is a prerequisite for admission to the defense.
<b>Requirements for qualification work</b>	The dissertation for the degree of Doctor of Philosophy is independent research that offers a topical scientific problem in the field of psychology of personal/social or organizational development or on the border of several fields, the results of which are an original contribution to the knowledge system and published in relevant

	<p>publications.</p> <p>The dissertation is performed in the process of obtaining the third (educational-scientific) level of higher education to establish compliance of the acquired learning outcomes (competencies) with the requirements of the educational-scientific program. Qualification work is subject to mandatory scrutiny for academic plagiarism, fabrication, falsification, and other types of academic dishonesty.</p>
<b>Requirements for public protection (demonstrations)</b>	<p>Public defense of the dissertation is held at a meeting of the council. The defense of the dissertation should be like an open scientific discussion, in which the chairman and members of the council are obliged to participate, as well as if desired, present at the meeting. During the defense, as per the law, the council provides audio recording (recording of phonograms) and video recording. The recording (sound recording, video recording) of such a meeting of the council shall be published on the official website of the higher education institution (scientific institution) no later than the next working day from the date of the meeting and shall be kept on the relevant website for at least three months. (scientific institution) on the issuance of a diploma of Doctor of Philosophy.</p> <p>During the meeting, the council establishes the level of acquisition of theoretical knowledge, skills, abilities, and other competencies, which enabled him to obtain new scientifically sound theoretical or experimental results of his research and solve specific scientific problems in the relevant field of knowledge and mastering scientific and pedagogical activity.</p>
