Head of the working group (guarantor of the educational program) I.P. Zadorozhna

June 22 2020

Preface

The educational and scientific program "Educational, Pedagogical Sciences" was developed by the working group of Ternopil Volodymyr Hnatiuk National Pedagogical University consisting of:

Zadorozhna Iryna Pavlivna, Doctor of Pedagogical Sciences, Professor, Head of the Department of English Philology and Methods of Teaching English of Ternopil Volodymyr Hnatiuk National Pedagogical University – **guarantor**;

members of the working group:

Kravets Volodymyr Petrovych, Doctor of Pedagogical Sciences, Professor, Full Member (Academician) of the National Academy of Pedagogical Sciences of Ukraine, Professor of the Department of Pedagogy and Education Management of Ternopil Volodymyr Hnatiuk National Pedagogical University;

Datskiv Olga Pavlivna, Candidate of Pedagogical Sciences, Associate Professor, Associate Professor of the Department of English Philology and Methods of Teaching English of Ternopil Volodymyr Hnatiuk National Pedagogical University;

Danylenko Oksana Oleksandrivna, a candidate for the degree of "Doctor of Philosophy", 4th year graduate student of the Department of English Philology and Methods of Teaching English of Ternopil Volodymyr Hnatiuk National Pedagogical University.

External stakeholders:

Mykytenko Natalia Oleksandrivna, Doctor of Pedagogical Sciences, Professor, Head of the Department of Foreign Languages for the Faculties of Natural Sciences of the Ivan Franko National University of Lviv;

Shcherbyak Yuriy Adamovych, Doctor of Pedagogical Sciences, Professor, Professor of the Department of Information and Socio-Cultural Activities of Ternopil National Economic University.

Reviewers:

Bidyuk Natalia Mykhailivna, Doctor of Pedagogical Sciences, Professor, Head of the Department of Foreign Language Practice and Teaching Methods of Khmelnytsky National University.

Kuzmenko Vasyl Vasyliovych, Doctor of Pedagogical Sciences, Professor, Head of the Department of Pedagogy and Management of Education of the Kherson Academy of Continuing Education of the Kherson Regional Council.

1.	Profile of the educational-scientific program "Educational, pedagogical
	sciences" of the specialty 011 "Educational, pedagogical sciences"

1.1. General information	
Full name of the	Ternopil Volodymyr Hnatiuk National Pedagogical
institution of higher	University, the Department of English Philology and
education and structural	Methods of Teaching English; the Department of
unit	Pedagogy and Management of Education
Degree of higher	Doctor of Philosophy (PhD); Doctor of Philosophy in
education and title of	Educational and Pedagogical Sciences
qualification	
The official name of the	"Educational, pedagogical sciences"
educational and scientific	
program	
Type of diploma and	Doctor of Philosophy (PhD), single, 60 ECTS credits,
scope of educational and	term of study - 4 years
scientific program	
Availability of	-
accreditation	
Cycle / level	FQ-EHEA – third cycle, EFQ-LLL – level 8 / NQF –
	level 8
Prerequisites	Presence of a master's degree, or educational
	qualification level of a specialist
Specialty	011 Educational, pedagogical sciences
Language (s) of	Ukrainian, English.

educational and scientific	
program	
12 The nurn	ose of the educational and scientific program

1.2. The purpose of the educational and scientific program

To ensure the acquisition of competencies by the PhD candidate that enable them to solve complex problems in the field of education through deep rethinking of existing and creation of new comprehensive knowledge and/or professional practice; to carry out independent scientific research, scientific and organizational, pedagogical and organizational, and practical activities in higher education institutions and research institutions; to prepare their own research in the field of educational and pedagogical sciences, the results of which have scientific novelty, practical significance, and require public defense.

1.3.	Characteristics of the educational and scientific program	
Subject area	01 Education / Pedagogy	
-	011 Educational, pedagogical sciences	
	Object of activity: education (in theoretical / practical,	
	synchronous / diachronic, socio-cultural and other	
	aspects).	

	Learning objectives: formation of competencies
	Learning objectives : formation of competencies
	necessary for innovative research activities in the field
	of education.
	Theoretical content of the subject area: history of
	development and current state of scientific knowledge;
	theories, concepts and educational terminology.
	Methods, techniques, technologies: critical analysis,
	evaluation and synthesis of new and complex ideas in
	the field of education; general scientific, pedagogical,
	statistical research methods, innovative educational
	technologies, ICT.
	Tools and equipment : library resources and
	technologies, including electronic; computer
	equipment and multimedia equipment; network
	systems for searching and processing information;
	software to support distance learning; statistical data
	processing and visualization programs that enable the
	achievement of learning objectives.
Academic rights of	Doctor of Philosophy can continue education at the
_	scientific level of Doctor of Science, receive any other
graduates	
	form of education, improve skills, engage in self-
	education.
Orientation of the	Educational and scientific.
educational program	
The main focus of the	Educational, pedagogical sciences. Scientific and
program and	professional training of a specialist. Study of features
specialization	and practical implementation of research work in the
	field of general secondary education, vocational
	education, higher education, postgraduate education,
	distance education, self-education, adult education.
	Research in the field of education.
Features of the program	The program is implemented in Ukrainian, some of its
	components are taught in foreign languages. Provides
	the opportunity to support the academic mobility
	program through distance learning.
	The educational component of the program is
	implemented over eight semesters, totaling 60 credits,
	has disciplines (mandatory components) that provide
	general and professional training, as well as disciplines
	of free choice of the applicant.
1	The program is implemented in small groups of
	I HIC DIOPIANI IS HUDCHCHICAI II SUAII PIONDS OF
	researchers, provides a differentiated approach to full-
	researchers, provides a differentiated approach to full- time and part-time students.
	researchers, provides a differentiated approach to full- time and part-time students. The program provides 36 ECTS credits for compulsory
	researchers, provides a differentiated approach to full- time and part-time students.

	Philosophy: historical-philosophical and modern meaningful parameters of knowledge, Academically and professionally oriented communication (English / German/ French)), which involves the acquisition by the graduate student (applicant) of general scientific (philosophical) competencies, language and speech competencies, universal skills of the researcher. Another 32 ECTS credits are provided for vocational training, which include 16 ECTS credits intended for elective disciplines within the educational and research program. <i>Scientific component of the program.</i> The scientific component of the educational and scientific program involves the implementation of their own research under the guidance of one or two supervisors with the appropriate design of the results in the form of qualifying research work. This component of the program is not measured by ECTS credits, but is drawn up separately in the form of an individual plan of research work of the graduate student (applicant) and is part of the curriculum. The peculiarity of the scientific component of the educational-scientific program of training doctors of philosophy in the specialty 011 Educational, pedagogical sciences is that some components of their own research graduate students will be able to perform during practical and seminar classes in training
	disciplines.
1.4. Suitability of	graduates for employment and further training
Suitability for employment	The graduate student has the right to hold such positions in accordance with the current version of the National Classification of Ukraine (Classifier of Professions DK 003: 2010), namely: 2310 Teachers of universities and institutions of higher education; 2310.1 Professors and associate professors;
	2351.1 Researchers. The sphere of employment is institutions and establishments subordinated to the Ministry of Education and Science of Ukraine: institutions of higher education of various forms of ownership, scientific institutions, institutions of postgraduate education.
Further training	Continuation of studies for the degree of Doctor of Pedagogical Sciences.
	i cuagogical percificos.

	Participation in educational programs, research
	1 1 0
1	
Teaching and learning	grants and scholarships (including abroad) that contain additional educational components. .5. Teaching and assessment Student-centered learning, problem-oriented learning, e-learning in the Moodle system, self-study, research- based learning. The volume of the educational component of the educational-scientific program of preparation of the doctor of philosophy makes 60 credits of ECTS. Preparation and defense during the first year of study of the dissertation research project with the study of approaches and methods of achieving the goal. Discussion of intermediate research results during the second, third and fourth years of study. Mastering the methodology of scientific work, skills of presenting its results. Conducting independent research using the resource base of the university and other resources. Individual scientific guidance, support and advice to the supervisor. The approach to teaching and learning involves: - application of methods of modern educational technologies (interactive, critical thinking, project, portfolio, training, problem-based learning, simulation- game, case studies, etc.) for productive mastery of multilevel competencies that provide personality-
	 oriented approach and development of thinking in development; application of technology of educational designing with pair or group execution of projects and their protection in the conditions of wide group discussion; organization of productive pedagogical interaction with scientific supervisors, scientific and pedagogical workers involved in the educational process; involvement of well-known specialists in the field of pedagogical science and practice in advising graduate students; information support for the participation of applicants in competitions for scientific scholarships, awards grants (including international); providing opportunities for applicants to participate in the preparation of research projects for competitions of the Ministry of Education and Science of Ukraine; direct participation in the implementation of budgetary and initiative research work.

Assessment	Educational component of the program.
	Tests, essays, presentations, current and modular
	control, tests, exams, defense of the report on practice,
	preliminary examination of the dissertation, defense of
	the dissertation.
	Final control of the success of the graduate student
	(applicant) is carried out in the form of:
	- exam and / or test - based on the results of studying
	the disciplines provided by the curriculum.
	Assessment of academic achievements is carried out
	according to the ECTS 100-point (rating scale), the
	national 4-point scale ("excellent", "good",
	"satisfactory", "unsatisfactory") and verbal ("credited",
	"not credited").) systems.
	Types of control: preliminary, current, final, self-
	control.
	Scientific component of the program. The end result
	of the graduate student's (applicant's) study is a
	properly designed, based on the results of scientific
	research, the dissertation manuscript, its preliminary
	examination, public defense and awarding the graduate
	student the degree of Doctor of Philosophy in 011
	Educational, Pedagogical Sciences.
	1.6. Program competencies

	 social life on the basis of a systematic scientific worldview, to link general philosophical problems with the solution of problems arising in professional and scientific-innovative activities, to apply empirical and theoretical methods of cognition. PLO 3. Knowledge of the basic scientific approaches, concepts, educational technologies, their historical aspects, to deeply understand the current theoretical and practical problems that need to be addressed in research. PLO 4. Knowledge of the cultural differences in writing and strategies of foreign language writing;

	the use of documentation in a foreign language in research projects.
Skills (application of knowledge)	PLO 5. Ability to review, critically analyze, evaluate and summarize different scientific views in the field of
	research, formulate and justify their own scientific concept.
	PLO 6. Ability to substantiate the methodology
	adequate to the subject of research, to implement modern methods of scientific research to solve a wide
	range of problems and tasks in the field of education;
	to use normative-legal and program-methodical
	documents that define work in an educational institution.
	PLO 7. Ability to determine the stages of experimental
	work; to organize information search, independent
	selection and qualitative processing of scientific information, empirical data and their interpretation; be
	able to formulate conclusions and generalizations in
	compliance with the principles of academic integrity;
	to organize and evaluate the implementation of stages
	of pedagogical experimental work with the use of innovative educational and modern information
	technologies.
	PLO 8. Ability to use methods and techniques for
	diagnosing the state of formation of students'
	competence; methods and techniques for diagnosing the quality of knowledge, the level of formation of
	skills and abilities of students for the analysis of the
	educational process (including distance), its correction
	and change.
	PLO 9. Ability to organize the teaching of disciplines
	in accordance with the tasks and principles of modern higher education, the requirements for regulatory,
	scientific, educational and methodological support of
	the educational process, use effective tools for
	diagnosing the academic achievements of future
	professionals.
	PLO 10. Capability to use praxeological skills: to apply methods and techniques of goal setting,
	implementation of necessary activities, evaluation and
	self-evaluation of performance in solving professional
	problems; health care, methods of discovering and
	realizing one's capabilities, personal and professionally significant qualities; implement strategies of research
	self-improvement and choose the means of self-
	development.

Presentation of results	PLO 11. Ability to present the results of their own
and communication	original research in state and foreign languages orally
	and in writing: produce and competently design various
	genres of scientific texts in accordance with modern
	•
	requirements (article, essay, presentation, conference
	speech, public popular science or scientific lecture, etc.)
	PLO 12. Ability to communicate and interact
	effectively in the scientific space, including
	international, to solve a variety of professional,
	• 1
	specialized and general tasks in the field of education
	and interdisciplinary research.
	PLO 13. Ability to adhere to the basic norms adopted
	by the scientific community, taking into account the
	international experience of communication; to make
	personal choices in moral and value situations that arise
	in the professional sphere of activity.
	PLO 14. Ability to use ICT for research and teaching;
	use modern practices and search techniques to work
	with scientific sources, use universal and specialized
	information resources.
1.8. Reso	urce support for program implementation
Staffing	Qualitative composition of scientific and pedagogical
	workers who carry out professional training of doctors
	of philosophy of the educational and scientific program
	"Educational, pedagogical sciences", meets the license
	conditions (according to the current specifications for
	preparation of applicants for higher education at the
	third (educational and scientific) level Doctor of
	Philosophy (Resolution of the Cabinet of Ministers of
	Ukraine N_{2} 1187 of December 30, 2015 (as amended
	and supplemented in accordance with the Resolution of
	the Cabinet of Ministers of Ukraine of May 10, 2018 No
	347) "On approval of licensing conditions for
	educational activities of educational institutions").
	The educational process is provided by 16 scientific
	and pedagogical employees of the university
	departments: 1 of them is a doctor of sciences,
	professor, full member of the National Academy of
	Pedagogical Sciences of Ukraine; 11 - doctors of
	sciences, professors, one - doctor of sciences, associate
	professor, three candidates of sciences, and 2 of them
	are associate professors. Teachers who ensure the
	implementation of this program have the appropriate
	basic education, the required number of publications in
	Scopus, Web of science, professional publications,

	take an active part in scientific and practical
	conferences of various levels (international, national,
	regional). All research and teaching staff, in
	accordance with the established schedules, undergo
	advanced training in higher education institutions and
	research institutes.
Material and technical	Material and technical support for the professional
support	training of doctors of philosophy of the educational
	program "Educational, pedagogical sciences" meets the
	license conditions. Teaching disciplines of the
	educational program "Educational, pedagogical
	sciences" is carried out in laboratories and specialized
	classrooms, which are equipped with appropriate
	equipment and facilities. The areas of the premises used
	in the educational process meet the sanitary norms and
	requirements of fire safety rules. According to the
	current standards for the training of applicants for
	higher education at the third (educational and scientific)
	level, Doctor of Philosophy (PhD) (Resolution of the
	Cabinet of Ministers of Ukraine № 1187 of December
	30, 2015, as amended by the Cabinet of Ministers of
	Ukraine of 10 May 2018 № 347) "On approval of
	licensing conditions for educational activities of
	educational institutions").
Information and	Information and educational and methodological
educational and	support meets the current standards for the preparation
methodological support	of higher education at the third (educational and
	scientific) level - Doctor of Philosophy (PhD)
	(Resolution of the Cabinet of Ministers of Ukraine №
	1187 of December 30, 2015, as amended in accordance
	with Resolution of the Cabinet of Ministers of Ukraine
	of May 10, 2018 № 347) "On approval of licensing
	conditions for educational activities of educational
	institutions").
	Applicants for higher education can use the funds of the
	scientific library of Ternopil Volodymyr Hnatiuk
	National Pedagogical University. The library's funds
	include textbooks, textbooks, professional periodicals,
	reference and other educational literature. The amount
	of funds is sufficient for independent and individual
	work of graduate students. Applicants have the
	opportunity to use the funds of the electronic library,
	which includes scientific and scientific-methodological
	publications of leading domestic and foreign scientists,
	university professors. The educational program is fully
	equipped with educational and methodological

	complexes from all disciplines, which are located in the											
educational space of the university.												
	1.9. Academic mobility											
National credit mobility	TNPU cooperates with research institutions of											
	Ukraine, NAS of Ukraine, NAPS of Ukraine,											
	maintains close ties with related institutions of higher											
	education of Ukraine											
International credit	According to the agreements of TNPU on international											
mobility	credit mobility, including ERASMUS +: with the											
	University of Marmara (November 20, 2019 –											
	November 19, 2024); Shenyang Pedagogical											
	University (November 29, 2018 – November 28, 2023);											
	Vienna Pedagogical Higher School (November 27,											
	2017 – November 27, 2020); University of Warsaw											
	(May 15, 2019); Higher School of Linguistics in											
	Czestochowa (October 27, 2014 – unlimited);											
	University of Teacher Education Carinthia – Viktor											
	Frankl University (February 6, 2009 – July 1, 2020) and											
	others.

2.1. List of components of the educational program

2.2. Structural and logical scheme of the components of the educational and scientific program

3. Form of c	certification of candidates for higher education
Forms of	Attestation of candidates for the educational level of Doctor
certification of	of Philosophy is carried out in the form of public defense of
candidates for	the dissertation. Prerequisite for admission to the defense is
higher education	the successful implementation of the candidate's individual
	curriculum.
Requirements for	The dissertation of the Doctor of Philosophy involves
the dissertation for	solving a current theoretical and / or applied problem in the
the degree of Doctor	field of education and demonstrates the ability of the
of Philosophy	applicant to conduct independent research, formulate new
	complex ideas and justify them.
	The dissertation should not contain academic plagiarism,
	falsification, fabrication.
	The dissertation must meet the requirements established by
	law.
Requirements for	The defense of the dissertation takes place in public at a
public defense	meeting of the specialized scientific council. Mandatory
	prerequisite for admission to the dissertation is approbation
	of research results and main conclusions at scientific
	conferences and their publication in professional scientific
	journals, including those included in scientometric
	databases, in accordance with the requirements of the
	Ministry of Education and Science of Ukraine.
Internal quality	There is an internal quality assurance system, which
assurance system of	provides for the implementation of the following
higher education	procedures and measures:
	– defining the principles and procedures for ensuring
	the quality of higher education;
	- monitoring and periodic review of educational
	programs;
	- ensuring the availability of the necessary resources
	for the organization of the educational process,
	including the independent work of applicants;
	– ensuring the availability of information systems for
	effective management of the educational process;
	- ensuring publicity of information about educational
	programs, degrees of higher education and
	qualifications;
	- ensuring the observance of academic integrity by
	employees of higher education institutions and
	applicants for higher education, including the creation
	and operation of an effective system for the prevention
	and detection of academic plagiarism.
	The quality assurance system for the quality of educational
	activities and the quality of higher education is assessed by
	 defining the principles and procedures for ensuring the quality of higher education; monitoring and periodic review of educational programs; ensuring the availability of the necessary resources for the organization of the educational process, including the independent work of applicants; ensuring the availability of information systems for effective management of the educational process; ensuring publicity of information about educational programs, degrees of higher education and qualifications; ensuring the observance of academic integrity by employees of higher education institutions and applicants for higher education, including the creation and operation of an effective system for the prevention and detection of academic plagiarism.

3. Form of certification of candidates for higher education

	Education or its independent accredited quality assessment and quality assurance institutions for compliance with the requirements for the quality assurance system approved by the National quality of higher education, and international standards and guidelines for ensuring the quality of higher education. Regulated by the Regulations on the internal quality assurance system in Ternopil Volodymyr Hnatiuk National Pedagogical University approved by the Academic Council of the University, protocol № 7 dated 23.02.2016 with changes and additions approved by the Academic Council of the University, protocol № 6 dated 23.12.2019, implemented by the order of the rector № 281-p of 23.12.2019.
Principles and procedures for	Information on the quality of higher education is open and accessible to the general public. The university forms and
ensuring the quality	improves the requirements for the quality assurance system
of education	of higher education, focusing on the main goals of higher
	education; has a transparent mechanism for the formation, monitoring and review of educational, educational and
	scientific programs that contain specific objectives,
	focused on learning outcomes and qualifications; clear
	rules for organizing student learning; necessary resources for educational activities and student support; collects,
	analyzes and uses the necessary information for effective
	management of its educational activities.
	Principles and procedures for ensuring the quality of education are provided in the "Program of measures to
	ensure the quality of education at Ternopil Volodymyr
	Hnatiuk National Pedagogical University", approved by
	the Academic Council of the University, protocol N_{2} 8 dated 29.01.2019, implemented by the order of the rector
	№ 29-p from 29.01.2019
Monitoring and	Regulated by the Regulations on the internal quality
periodic review of educational	assurance system in Ternopil Volodymyr Hnatiuk National Pedagogical University, approved by the Academic
programs	Council of the University, protocol № 7 dated 23.02.2016
	with changes and additions approved by the Academic
	Council of the University, protocol № 6 dated 23. 12. 2019,
	implemented by the order of the rector N_{2} 281-p of 23.12.2019.
Annual assessment	It is carried out twice a year in the form of attestation and
of applicants for	current assessment of scientific activity of applicants for
higher education	educational and scientific level of Doctor of Philosophy at
	the graduating departments.

Professional	It is regulated by the Regulations on professional
development of	
scientific and	pedagogical workers, approved by the Academic Council
pedagogical,	of the University, protocol № 1 dated 30. 08. 2019, put into
teaching and	effect by the order of the rector \mathbb{N} 180-p dated 02. 09. 2019.
research staff	
Availability of	
necessary resources	methodological support of the educational process meets
for the organization	the requirements of the Resolution of the Cabinet of
of the educational	Ministers of Ukraine № 1187 of December 30, 2015 "On
process	approval of Licensing conditions for educational activities
	of educational institutions."
Publicity of	Public access to information on the training of doctors of
information about	philosophy in the educational and scientific program
educational	"Educational, Pedagogical Sciences" is provided at the
programs, degrees of	following links:
higher education	info@tnpu.edu.ua
and qualifications	http://www.tnpu.edu.ua/naukova-robota/aspirantura.php
Prevention and	Prevention of plagiarism (compilation) in the educational
detection of	process is carried out by:
academic plagiarism	– development, publication and dissemination of
	methodological materials with a unified definition of
	requirements for the proper citation of materials used in
	written works;
	– studying the requirements for writing written
	works within the relevant disciplines, ways to correctly use
	information from other sources and avoid plagiarism, as
	well as rules for describing sources and citations.
	5
	Supervisors are required to monitor and prevent the facts
	of academic plagiarism at all stages of dissertation
	research.
	Detection of plagiarism (compilations) in the presented
	chapters of the dissertation or articles of graduate students
	may be grounds for exclusion from graduate school.
